decentralized data management • open science & software
materials discovery • ab initio calculations

RESEARCH INTERESTS

My background in computational materials science has left me with an overarching interest in the application of machine learning, open source software & infrastructure, and data management practices to accelerate and enhance scientific workflows for discovery in the chemical and materials sciences.

EDUCATION

2016–2023 **PhD Physics**, *(submitted July 2023)*, Theory of Condensed Matter Group, University of Cambridge

2015–2016 **MPhil Scientific Computing**, University of Cambridge, *Pass with distinction*

2011–2015 **MPhys Physics with Theoretical Physics**, University of Manchester, *First Class (Hons)*

SELECTED EXPERIENCE

2020– **Research Assistant** then **BEWARE Research Fellow** (2022 onwards)

Université catholique de Louvain and Matgenix, with Prof Gian-Marco Rignanese

- Co-creator and architect of *datalab*, open source data management software for sample tracking and characterisation, lab management, and machine learning, deployed at several labs internationally.
- High-throughput machine-learning accelerated workflows for materials discovery and design.
- Leading development of the OPTIMADE API specification and associated software.

2021– **Visiting Researcher: Data management platforms for materials chemistry research**

University of Cambridge, with Prof Clare Grey FRS

- Developing bespoke data management platforms for materials chemistry and battery research.
- Supervising contributions from a full-time software developer and providing user training.

2024– **Scientific Software Consultant** and **Director** (part-time)

datalab industries ltd.

- Supporting the open source development of OPTIMADE and *datalab* via consultancy services.
- Customisation and deployment of *datalab* for industrial R&D and academic labs.

2016–2020 **PhD student: Crystal structure prediction for next-generation energy storage**

University of Cambridge, with Dr Andrew Morris

- Computional materials discovery for conversion anodes for Li, Na and K-ion batteries.
- Author of two open-source Python packages: database approaches for high-throughput calculations and materials design with `matador` and crystal structure prediction with `ilustrado`.

COMPUTING

Languages **Python**, Javascript, Vue.js, Fortran, C++

Practices **Test-driven development, CI/CD, Cloud Automation, HPC**

Tools **git**, **vim**, **Docker**, **Ansible**, **Terraform**

Expertise Web APIs, databases, machine learning, high-throughput workflows

OTHER EXPERIENCE

2022 **Postdoctoral Researcher: Recommender systems for crystal structure search**
Cambridge Crystallographic Data Centre, Cambridge, UK

2019 **Visiting Researcher: Machine learning for materials discovery**
Aalto University, Finland, with Profs Adam Foster & Patrick Rinke

2019 **Scientific Software Developer (Intern): Multi-objective optimisation**
Enthought Inc., Cambridge

2014, 2015 **UG research: Interactions of quantised vortices in superfluid helium**
University of Manchester, with Dr Paul Walmsley & Prof Andrei Golov

2013 **UG research: Hard sphere packing of nanotube-encapsulated fullerenes**
University of Nottingham, with Dr Ho-Kei Chan & Prof Elena Besley

SELECTED (AWARDS + HONOURS)

2022 BEWARE2 Fellowship from the Wallonia-Brussels Federation (approx. €300,000).

2021 PI for "Interoperable data management for fundamental battery research", BIG-MAP External Stakeholder Initiative (approx. €150,000).

SELECTED (TEACHING + SERVICE)

2018– Reviewed manuscripts and data for *JOSS* (x6), *Digital Discovery* (x5), *J. Phys.: Cond. Mat.* (x4), *Mach. Learn.: Sci. Technol.* (x2), *npj. Comp. Mater.* (x1), *Sci Data* (x1), *Sci. Rep.* (x1)

2022–2024 Proposed and co-lead a MaRDA working group on metadata extractors for materials science.

2022–2024 Initiator and organiser of the CECAM Workshop series *Machine-actionable Data Interoperability for Chemical Sciences* (MADICES, February 2022 and April 2024)

2019-2021 Demonstrator: Part II Computational Physics, 3x Part IB Intro to Computing, Cavendish Laboratory

2016–2018 Supervisor: 2x Part IB Electromagnetism, Dynamics and Thermodynamics, Selwyn College

2012–2015 Tutor: GCSE Maths & Key Stage 2 Programming for The Tutor Trust, Manchester

SELECTED RECENT PRESENTATIONS

2025 Invited seminar: *Decentralized materials research data management, curation and dissemination for accelerated discovery*, Computational Chemistry Seminar Series, University of Warwick

2024 Invited talk: *Decentralized materials research data management, curation and dissemination for accelerated discovery*, Democratizing AI in Materials Science —– A Pathway to Broaden the Impact of Materials Research, MRS Fall Meeting, Boston, USA

Contributed talk/paper: *Optical materials discovery and design with federated databases and machine learning*, Faraday Discussions, University of Oxford, United Kingdom.

Invited talk: *Federated, interoperable databases for accelerated materials discovery and design*, CECAM Flagship Workshop on MLIPs and Accessible Databases, Grenoble, France.

Invited talk: *Open Databases Integration for Materials Design* at the CECAM Flagship Workshop for FAIR and TRUE Soft Matter Simulations, Max Planck Institute for Polymer Research, Germany.

Invited talk: *Open Databases Integration for Materials Design* at the Actively Learning Materials Science (AL4MS2023) workshop, Aalto University, Finland.
