Matthew Evans

matthew@ml-evs.science
ml-evs.science
ml-evs

I am an open source software developer trying to actualise my vision for the future of decentralized data management in materials science and chemistry.

materials discovery • ab initio calculations
decentralized data management• open science & software

EDUCATION

2016–2024 **PhD Physics**, *(submitted July 2023)*, Theory of Condensed Matter Group, University of Cambridge

2015–2016 **MPhil Scientific Computing**, University of Cambridge, *Pass with distinction*

2011–2015 **MPhys Physics with Theoretical Physics**, University of Manchester, *First Class (Hons)*

EXPERIENCE

2020– **Research Associate** then **BEWARE Research Fellow** (2022 onwards)
Universitè catholique de Louvain and Matgenix, with Prof Gian-Marco Rignanese
- Co-creator and architect of *datalab*, open source data management software for sample tracking and characterisation, lab management, and machine learning, deployed at several labs internationally.
- High-throughput machine-learning accelerated workflows for materials discovery and design.
- Leading development of the OPTIMADE API specification and associated software.

2021– **Visiting Researcher: Data management platforms for materials chemistry research**
University of Cambridge, with Prof Clare Grey FRS
- Developing bespoke data management platforms for materials chemistry and battery research.
- Supervising development by group members and a full-time software engineer.

2024– **Scientific Software Consultant** and **Director** (part-time)
datalab industries ltd.
- Supporting the open source development of OPTIMADE and *datalab* via consultancy services.
- Customisation and deployment of *datalab* for industrial R&D and academic labs.

2022 **Research Associate**
Cambridge Crystallographic Data Centre
2-month contract to implement a recommender system for the Cambridge Structural Database.

2016–2020 **PhD student: Crystal structure prediction for next-generation energy storage**
with Dr Andrew Morris *(University of Cambridge)*
- Computional materials discovery for conversion anodes for Li, Na and K-ion batteries.
- Author of two open-source Python packages: database approaches for high-throughput calculations and materials design with `matador` and crystal structure prediction with `ilustrado`.
- Active member of the OPTIMADE consortium for materials database interoperability and author of the `optimade-python-tools` package (used in production by The Materials Project, NOMAD, Materials Cloud and others) and `odbx` implementation.

2019 **Visiting Researcher: Machine learning for materials discovery**
with Prof Adam Foster & Prof Patrick Rinke, *Department of Applied Physics, Aalto University*

2019 **Scientific Software Developer (Intern)**
Enthought Inc., Cambridge

2014, 2015 **UG research: Interactions of quantised vortices in superfluid helium**
with Dr Paul Walmsley & Prof Andrei Golov *(University of Manchester)*

2014–2015 **MPhys project: Electronic structure of defects in graphene superlattices**
with Prof Francisco Guinea *(University of Manchester)*

2013 **UG research: Hard sphere packing of nanotube-encapsulated fullerenes**
with Dr Ho-Kei Chan & Prof Elena Besley *(University of Nottingham)*

COMPUTING

Exposure: **Daily**, Intermittent, *Occasional*.

Languages	**Python**, Javascript, Vue.js, Fortran, Cython, C++	Expertise	Web APIs & databases, HT workflows, ML, Cloud Automation
DFT	**CASTEP**, Quantum Espresso, *GPAW*	Stack	FastAPI, pydantic, Flask, Tensorflow
Tools	**git**, **vim**, **Docker**, **Ansible**, **Terraform**	Practices	**Test-driven development, CI/CD**

(TEACHING + SERVICE)

2022– Organiser of the CECAM Workshop series *Machine-actionable Data Interoperability for Chemical Sciences* (MADICES, February 2022 and April 2024)

2022–2024 Founded and co-lead a MaRDA working group on metadata extractors for materials science and chemistry

2018– Reviewed manuscripts and data for *npj. Comp. Mater.* (x1), *Sci Data* (x1), *J. Phys.: Cond. Mat.* (x4), *Scientific Reports* (x1), *Digital Discovery* (x4), *Machine Learning: Science & Technology* (x2), and *Journal of Open Source Software* (x6)

2020–2022 Co-chair of the Research Data Alliance (RDA) IG *Materials Data, Infrastructure & Interoperability*

2021 Lecturer for "Working with Materials Databases" at the ICTP-East African Institute for Fundamental Research Training School *Machine Learning for Electronic Structure and Molecular Dynamics*

2021 Mentor at Acceleration Consortium Hackathon on Scientific Databases

2021 Developed and delivered a 2-day OPTIMADE tutorial for the NOMAD Virtual Tutorial Series.

2016–2020 Active member of TCM `sysadmin` team, Cavendish Laboratory

2019-2021 Demonstrator: Part II Computational Physics, Cavendish Laboratory
- Demonstrated scientific Python to beginners in weekly labs (2019 only).
- Conceptualised and delivered a tutorial on the basics of version control with Git (2019-2021).

2016–2018 Supervisor: 2x Part IB Electromagnetism, Dynamics and Thermodynamics, Selwyn College
- Small group teaching, providing detailed feedback on assigned problems.

2016–2019 Demonstrator: 3x Part IB Introduction to Computing (C++), Cavendish Laboratory

2016–2019 Demonstrator: 4x at annual CASTEP workshop, University of Oxford

2017 Volunteer: 2nd Conference of Research Software Engineers, University of Manchester

2016–2017 Volunteer: Key Stage 2 Code Club, Ridgefield Primary School, Cambridge

2012–2015 Tutor: GCSE Maths & Key Stage 2 Programming for The Tutor Trust, Manchester
- Provided tuition to small groups and 'looked after children' across 15 schools.
- Helped lead a successful pilot to teach primary school children programming using Scratch.

(AWARDS + HONOURS)

2022 BEWARE2 Fellowship from the Wallonia-Brussels Federation to fund 3 years of postdoctoral work (approx. €300,000).

2021 PI for "Interoperable data management for fundamental battery research", BIG-MAP External Stakeholder Initiative, total funding €150,000 (personal allocation €50,000).

2019 HPC-Europa 3 funding to visit Aalto University for 7 weeks and associated computing time.

2018 Tier-2 HPC Resource Allocation: PI on project awarded 2 MCPUh, *Crystal structure prediction for next-generation solar absorbers*, **M. L. Evans**, D. O. Scanlon and A. J. Morris.

HPC Midlands+ Substantial Project: awarded 1.3 MCPUh for *High-throughput materials discovery for energy applications*, **M. L. Evans** and A. J. Morris.

2017 Tier-2 HPC Resource Allocation: Co-investigator on project awarded 4 MCPUh, *Ab initio structure prediction for next-generation battery materials*, B. Karasulu, **M. L. Evans** and A. J. Morris.

2015 Tesella Prize for Software, University of Manchester, for the most effective use of software in a final year physics project.

2013, 2014 Undergraduate research bursary for two summers as an undergraduate, totalling £4200.

2011–2015 Means-tested and merit based scholarship to study at the University of Manchester, worth £12,000.

PRESENTATIONS

2024 Invited talk (upcoming): *Decentralized materials research data management, curation and dissemination for accelerated discovery*, Democratizing AI in Materials Science —– A Pathway to Broaden the Impact of Materials Research, MRS Fall Meeting, Boston, USA

Contributed paper: *Optical materials discovery and design with federated databases and machine learning*, Faraday Discussions, University of Oxford, United Kingdom.

Invited talk: *Federated, interoperable databases for accelerated materials discovery and design*, CECAM Flagship Workshop on MLIPs and Accessible Databases, Grenoble, France.

Contributed talk: *datalab: bespoke, extensible data management platforms for materials research*, Physical Sciences Data Infrasturcture Townhall Meeting, United Kingdom.

Invited seminar: *Interoperable data management for fundamental materials chemistry research*, Department of Chemical Engineering, Imperial College London, United Kingdom.

2023 Invited seminar: *Interoperable data management for fundamental materials chemistry research*, Department of Chemistry, University of Nottingham, United Kingdom.

Contributed talk: *Interoperable data management for fundamental battery research*, RSC Annual Advanced Battery Materials Symposium, Institute of Physics, United Kingdom.

Invited seminar: *Interoperable data management for fundamental battery research*, Conductivity and Catalysis Lab, Technische Universität Berlin, Germany.

Invited talk: *Open Databases Integration for Materials Design* at the CECAM Flagship Workshop for FAIR and TRUE Soft Matter Simulations, Max Planck Institute for Polymer Research, Germany.

Invited seminar: *Interoperable data management for fundamental battery research*, Laboratory of Materials Simulation, Paul Scherrer Institut, Switzerland.

Invited talk: *Metadata extractors for interoperable ETL*, MaRDA Alliance Annual Meeting

Invited talk: *Open Databases Integration for Materials Design* at the Actively Learning Materials Science (AL4MS2023) workshop, Aalto University, Finland.

2021 Invited panel discussions: *International Materials Data: Joint Meeting* and *Metadata for Data Indexing and Discovery in Materials Science*, Research Data Alliance (RDA) 18th Virtual Plenary Meeting

Invited talk: *The OPTIMADE Ecosystem*, DoE Battery Genome Initiative

Invited panel discussion: *Delivery platforms for open marketplaces*, Research Data Alliance (RDA) 17th Virtual Plenary Meeting

2020 Invited talk: *The OPTIMADE Specification*, Research Data Alliance (RDA) 16th Virtual Plenary Meeting: Data Infrastructure for Collaborations in Materials Research

Invited talk and workshop demonstration: *odbx & OPTIMADE* and *optimade-python-tools*, CECAM Workshop, Open Databases Integration for Materials Design 2020

2019 Contributed talk: *Phosphorus anodes for potassium-ion batteries: insights from crystal structure prediction*, EMRS Spring 2019, Nice, France

Invited talk: *matador & OPTIMADE*, CECAM Workshop, Open Databases Integration for Materials Design 2019, EPFL, Switzerland

2018 Contributed talk: *Sn-P anodes for potassium-ion batteries: insights from crystal structure prediction*, SMARTER6 Conference, Ljubljana, Slovenia

Invited talk: *matador: databases and crystal structure prediction* (slides), CECAM Workshop, Open Databases Integration for Materials Design 2018, EPFL, Switzerland

2017 Invited seminar: *Crystal structure prediction for next-generation battery anodes* (slides), Solid State Seminar Series, University of Cambridge

Poster Presentation: 13th RSC Conference in Materials Chemistry (poster), University of Liverpool

2016 Poster Presentation: SMARTER5 Conference, University of Bayreuth, Germany
