🌐 [ml-evs](#)

*energy storage materials · ab initio calculations  
crystal structure databases · open science & software*

## EDUCATION

- 2016– **PhD Physics**, Theory of Condensed Matter Group, University of Cambridge.  
2015–2016 **MPhil Scientific Computing**, University of Cambridge, *Pass with distinction*.  
2011–2015 **MPhys Physics with Theoretical Physics**, University of Manchester, *First Class (Hons)*.

## EXPERIENCE

- 2020– **Postdoctoral Researcher**  
with Prof Gian-Marco Rignanese (*Université catholique de Louvain*)
- Machine learning for small materials datasets (MODNet)
  - High-throughput workflows for computational materials science
- 2016–2020 **PhD student: Crystal structure prediction for next-generation energy storage**  
with Dr Andrew Morris (*University of Cambridge/University of Birmingham*)
- Computational materials discovery for conversion anodes for Li, Na and K-ion batteries
  - Author of two open-source Python packages: database approaches for high-throughput calculations and materials design with [matador](#) and crystal structure prediction with [ilustrado](#)
  - Contributed to the [CASTEP](#) and [OptaDOS](#) codes.
  - Active member of the [OPTIMADE consortium](#) for materials database interoperability and author and maintainer of [optimade-python-tools](#) packages and [odbx](#) implementation
- 2019 **Visiting Researcher**  
Department of Applied Physics, Aalto University
- Received HPC-Europa funding to visit the group of Prof Adam Foster for 7 weeks, with computational resources provided by the Finnish IT center for science (CSC).
- 2019 **Scientific Software Developer (Intern)**  
Enthought Inc., Cambridge
- Worked on the open source, Horizon 2020 [FORCE project](#), with a focus on adding functionality to the workflow manager for multi-criteria optimisations. Helped develop Cython bindings for the ACADO toolkit.
- 2014, 2015 **UG research: Interactions of quantised vortices in superfluid helium**  
with Dr Paul Walmsley & Prof Andrei Golov (*University of Manchester*)
- 2014–2015 **MPhys project: Electronic structure of defects in graphene superlattices**  
with Prof Francisco Guinea (*University of Manchester*)
- 2013 **UG research: Hard sphere packing of nanotube-encapsulated fullerenes**  
with Dr Ho-Kei Chan & Prof Elena Besley (*University of Nottingham*)

*Last modified: March 25, 2021*

## COMPUTING

Exposure: **Daily**, Intermittent, *Occasional*.

Languages **Python**, Fortran, Cython, C++

Databases **MongoDB**, SQL, *Elasticsearch*

Tools **git**, **vim**, **Docker**

Practices **Test-driven development**, CI

## (TEACHING + SERVICE)

- 2020- Co-chair of the Research Data Alliance (RDA) Interest Group “Materials Data, Infrastructure & Interoperability”
- 2018- Reviewed manuscripts for *Scientific Reports*, *npj. Computational Materials*
- 2016–2020 Active member of TCM sysadmin team, Cavendish Laboratory
- 2019-2021 Demonstrator: Part II Computational Physics, Cavendish Laboratory
  - Demonstrated scientific Python to beginners in weekly labs (2019 only).
  - Wrote and delivered a tutorial on the basics of [version control with Git](#) (2019-2021).
- 2016–2018 Supervisor: 2x Part IB Electromagnetism, Dynamics and Thermodynamics, Selwyn College
  - Small group teaching, providing detailed feedback on assigned problems.
- 2016–2019 Demonstrator: 3x Part IB Introduction to Computing (C++), Cavendish Laboratory
- 2016–2019 Demonstrator: 4x at annual CASTEP workshop, University of Oxford
- 2017 Volunteer: 2nd Conference of Research Software Engineers, University of Manchester
- 2016–2017 Volunteer: Key Stage 2 Code Club, Ridgefield Primary School, Cambridge
- 2012–2015 Tutor: GCSE Maths & Key Stage 2 Programming for [The Tutor Trust](#), Manchester
  - Provided tuition to small groups and ‘looked after children’ across 15 schools.
  - Helped lead a successful pilot to teach primary school children programming using Scratch.

## (AWARDS + HONOURS)

- 2019 HPC-Europa 3 funding to visit Aalto University for 7 weeks and associated computing time.
- 2018 Tier-2 HPC Resource Allocation: PI on project awarded 2 MCPUh, *Crystal structure prediction for next-generation solar absorbers*, **M. L. Evans**, D. O. Scanlon and A. J. Morris.  
HPC Midlands+ Substantial Project: awarded 1.3 MCPUh for *High-throughput materials discovery for energy applications*, **M. L. Evans** and A. J. Morris.
- 2017 Tier-2 HPC Resource Allocation: Co-investigator on project awarded 4 MCPUh, *Ab initio structure prediction for next-generation battery materials*, B. Karasulu, **M. L. Evans** and A. J. Morris.
- 2015 Tesella Prize for Software, University of Manchester, for the most effective use of software in a final year physics project.
- 2013, 2014 Undergraduate research bursary for two summers as an undergraduate, totalling £4200.
- 2011–2015 Means-tested and merit based scholarship to study at the University of Manchester, worth £12,000.

## SELECTED PRESENTATIONS

- 2015– Presented posters and talks at over 20 conferences and workshops both nationally and internationally. Selected works can be found on my [personal website](#).
- 2020 Invited talk: *The OPTIMADE Specification*, Research Data Alliance (RDA) 16th Virtual Plenary Meeting: Data Infrastructure for Collaborations in Materials Research  
Invited talk and workshop demonstration: *odbx & OPTIMADE and optimade-python-tools*, CECAM Workshop, Open Databases Integration for Materials Design 2020

*Last modified: March 25, 2021*

- 2019 Contributed talk: *Phosphorus anodes for potassium-ion batteries: insights from crystal structure prediction*, EMRS Spring 2019, Nice, France  
Invited talk: *matador & OPTIMADE*, CECAM Workshop, Open Databases Integration for Materials Design 2019, EPFL, Switzerland
- 2018 Contributed talk: *Sn-P anodes for potassium-ion batteries: insights from crystal structure prediction*, SMARTER6 Conference, Ljubljana, Slovenia  
Invited talk: *matador: databases and crystal structure prediction* ([slides](#)), CECAM Workshop, Open Databases Integration for Materials Design 2018, EPFL, Switzerland
- 2017 Invited talk: *Crystal structure prediction for next-generation battery anodes* ([slides](#)), Solid State Seminar Series, University of Cambridge  
Poster Presentation: 13th RSC Conference in Materials Chemistry ([poster](#)), University of Liverpool
- 2016 Poster Presentation: SMARTER5 Conference, University of Bayreuth, Germany

## PUBLICATIONS

Status: in preparation, [preprint](#), published. Underline indicates (joint) first authorship or lead theory authorship.
