

I am an open source software developer trying to actualise my vision for the future of decentralized data management in the chemical and materials sciences.

materials discovery • ab initio calculations
decentralized data management • open science & software

EDUCATION

- 2016–2023 **PhD Physics**, Theory of Condensed Matter Group, University of Cambridge
2015–2016 **MPhil Scientific Computing**, University of Cambridge, *Pass with distinction*
2011–2015 **MPhys Physics with Theoretical Physics**, University of Manchester, *First Class (Hons)*

EXPERIENCE

- 2020– **Researcher** then **BEWARE Research Fellow** (jointly at **Matgenix**, 2022 onwards)
with Prof Gian-Marco Rignanese (*Université catholique de Louvain*)
– High-throughput, machine-learning accelerated workflows for materials discovery and design.
– Leading development of the **OPTIMADE** API specification and associated software.
- 2021– **Visiting Researcher**
in the group of Prof Clare Grey (*University of Cambridge*)
– Leading development of **dataLab**, a data management API and web UI for samples and associated characterisation via electrochemical cycling, NMR, XRD, etc, deployed at several research groups and labs internationally.
– Founder and co-leader of a **MaRDA** working group on interoperable **metadata extractors** in materials science and chemistry.
- 2022 **Postdoctoral Research Associate**
Cambridge Crystallographic Data Centre
2-month contract to implement a recommender system for the Cambridge Structural Database.
- 2016–2020 **PhD student: Crystal structure prediction for next-generation energy storage**
with Dr Andrew Morris (*University of Cambridge*)
– Computational materials discovery for conversion anodes for Li, Na and K-ion batteries.
– Author of two open-source Python packages: database approaches for high-throughput calculations and materials design with **matador** and crystal structure prediction with **ilustrado**.
– Active member of the **OPTIMADE consortium** for materials database interoperability and author of the **optimade-python-tools** package (used in production by The Materials Project, NOMAD, Materials Cloud and others) and **odbx** implementation.
- 2019 **Visiting Researcher: Machine learning for materials discovery**
with Prof Adam Foster & Prof Patrick Rinke, *Department of Applied Physics, Aalto University*
- 2019 **Scientific Software Developer (Intern)**
Enthought Inc., Cambridge
- 2014, 2015 **UG research: Interactions of quantised vortices in superfluid helium**
with Dr Paul Walmsley & Prof Andrei Golov (*University of Manchester*)
- 2014–2015 **MPhys project: Electronic structure of defects in graphene superlattices**
with Prof Francisco Guinea (*University of Manchester*)
- 2013 **UG research: Hard sphere packing of nanotube-encapsulated fullerenes**
with Dr Ho-Kei Chan & Prof Elena Besley (*University of Nottingham*)

COMPUTING

	Exposure: Daily , Intermittent, <i>Occasional</i> .		
Languages	Python , Javascript, Vue.js, Fortran, Cython, C++	Expertise	Web APIs & databases, HT workflows, ML, Cloud Automation
DFT	CASTEP , Quantum Espresso, <i>GPAW</i>	Stack	FastAPI, pydantic, Flask, Tensorflow
Tools	git , vim , Docker , Ansible , Terraform	Practices	Test-driven development , CI/CD

(TEACHING + SERVICE)

- 2022– **Organiser** of the CECAM Workshop series *Machine-actionable Data Interoperability for Chemical Sciences* (**MADICES**, February 2022 and April 2024)
- 2022–2024 Founded and co-lead a **MaRDA** working group on **metadata extractors** for materials science and chemistry
- 2018– Reviewed manuscripts and data for *npj. Comp. Mater.* (x1), *Sci Data* (x1), *J. Phys.: Cond. Mat.* (x4), *Scientific Reports* (x1), *Digital Discovery* (x4), *Machine Learning: Science & Technology* (x2), and *Journal of Open Source Software* (x5)
- 2020–2022 Co-chair of the Research Data Alliance (RDA) *IG Materials Data, Infrastructure & Interoperability*
- 2021 Lecturer for “Working with Materials Databases” at the ICTP-East African Institute for Fundamental Research Training School *Machine Learning for Electronic Structure and Molecular Dynamics*
- 2021 Mentor at Acceleration Consortium Hackathon on Scientific Databases
- 2021 Developed and delivered a **2-day OPTIMADE tutorial** for the NOMAD Virtual Tutorial Series.
- 2016–2020 Active member of TCM sysadmin team, Cavendish Laboratory
- 2019–2021 Demonstrator: Part II Computational Physics, Cavendish Laboratory
– Demonstrated scientific Python to beginners in weekly labs (2019 only).
– Conceptualised and delivered a tutorial on the basics of **version control with Git** (2019–2021).
- 2016–2018 Supervisor: 2x Part IB Electromagnetism, Dynamics and Thermodynamics, Selwyn College
– Small group teaching, providing detailed feedback on assigned problems.
- 2016–2019 Demonstrator: 3x Part IB Introduction to Computing (C++), Cavendish Laboratory
- 2016–2019 Demonstrator: 4x at annual CASTEP workshop, University of Oxford
- 2017 Volunteer: 2nd Conference of Research Software Engineers, University of Manchester
- 2016–2017 Volunteer: Key Stage 2 Code Club, Ridgefield Primary School, Cambridge
- 2012–2015 Tutor: GCSE Maths & Key Stage 2 Programming for **The Tutor Trust**, Manchester
– Provided tuition to small groups and ‘looked after children’ across 15 schools.
– Helped lead a successful pilot to teach primary school children programming using Scratch.

(AWARDS + HONOURS)

- 2022 BEWARE2 Fellowship from the Wallonia-Brussels Federation to fund 3 years of postdoctoral work (approx. €300,000).
- 2021 PI for “Interoperable data management for fundamental battery research”, BIG-MAP External Stakeholder Initiative, total funding €150,000 (personal allocation €50,000).
- 2019 HPC-Europa 3 funding to visit Aalto University for 7 weeks and associated computing time.
- 2018 Tier-2 HPC Resource Allocation: PI on project awarded 2 MCPUh, *Crystal structure prediction for next-generation solar absorbers*, **M. L. Evans**, D. O. Scanlon and A. J. Morris.
HPC Midlands+ Substantial Project: awarded 1.3 MCPUh for *High-throughput materials discovery for energy applications*, **M. L. Evans** and A. J. Morris.
- 2017 Tier-2 HPC Resource Allocation: Co-investigator on project awarded 4 MCPUh, *Ab initio structure prediction for next-generation battery materials*, B. Karasulu, **M. L. Evans** and A. J. Morris.
- 2015 Tesella Prize for Software, University of Manchester, for the most effective use of software in a final year physics project.
- 2013, 2014 Undergraduate research bursary for two summers as an undergraduate, totalling £4200.
- 2011–2015 Means-tested and merit based scholarship to study at the University of Manchester, worth £12,000.

PRESENTATIONS

- 2024 (upcoming) Invited talk: MRS Fall Meeting, Boston, USA.
- 2024 Contributed talk: *datalab: bespoke, extensible data management platforms for materials research*, Physical Sciences Data Infrastructure Townhall Meeting, United Kingdom.
Invited seminar: *Interoperable data management for fundamental materials chemistry research*, Department of Chemical Engineering, Imperial College London, United Kingdom.
- 2023 Invited seminar: *Interoperable data management for fundamental materials chemistry research*, Department of Chemistry, University of Nottingham, United Kingdom.
Contributed talk: *Interoperable data management for fundamental battery research*, RSC Annual Advanced Battery Materials Symposium, Institute of Physics, United Kingdom.
Invited seminar: *Interoperable data management for fundamental battery research*, Conductivity and Catalysis Lab, Technische Universität Berlin, Germany.
Invited talk: *Open Databases Integration for Materials Design* at the CECAM Flagship Workshop for FAIR and TRUE Soft Matter Simulations, Max Planck Institute for Polymer Research, Germany.
Invited seminar: *Interoperable data management for fundamental battery research*, Laboratory of Materials Simulation, Paul Scherrer Institut, Switzerland.
Invited talk: *Metadata extractors for interoperable ETL*, MaRDA Alliance Annual Meeting
Invited talk: *Open Databases Integration for Materials Design* at the Actively Learning Materials Science (AL4MS2023) workshop, Aalto University, Finland.
- 2021 Invited panel discussions: *International Materials Data: Joint Meeting and Metadata for Data Indexing and Discovery in Materials Science*, Research Data Alliance (RDA) 18th Virtual Plenary Meeting
Invited talk: *The OPTIMADE Ecosystem*, DoE Battery Genome Initiative
Invited panel discussion: *Delivery platforms for open marketplaces*, Research Data Alliance (RDA) 17th Virtual Plenary Meeting
- 2020 Invited talk: *The OPTIMADE Specification*, Research Data Alliance (RDA) 16th Virtual Plenary Meeting: Data Infrastructure for Collaborations in Materials Research
Invited talk and workshop demonstration: *odbx & OPTIMADE and optimade-python-tools*, CECAM Workshop, Open Databases Integration for Materials Design 2020
- 2019 Contributed talk: *Phosphorus anodes for potassium-ion batteries: insights from crystal structure prediction*, EMRS Spring 2019, Nice, France
Invited talk: *matador & OPTIMADE*, CECAM Workshop, Open Databases Integration for Materials Design 2019, EPFL, Switzerland
- 2018 Contributed talk: *Sn-P anodes for potassium-ion batteries: insights from crystal structure prediction*, SMARTER6 Conference, Ljubljana, Slovenia
Invited talk: *matador: databases and crystal structure prediction* (**slides**), CECAM Workshop, Open Databases Integration for Materials Design 2018, EPFL, Switzerland
- 2017 Invited seminar: *Crystal structure prediction for next-generation battery anodes* (**slides**), Solid State Seminar Series, University of Cambridge
Poster Presentation: 13th RSC Conference in Materials Chemistry (**poster**), University of Liverpool
- 2016 Poster Presentation: SMARTER5 Conference, University of Bayreuth, Germany
