

# Matthew Evans

✉ [matthew@ml-evs.science](mailto:matthew@ml-evs.science)  
🌐 [ml-evs.science](https://ml-evs.science)  
🐙 [ml-evs](#)

*materials discovery • ab initio calculations*  
*decentralized data management • open science & software*

## RESEARCH INTERESTS

My background in computational materials science has left me with an overarching research interest in the application of machine learning, collaborative open source software and infrastructure, and digital data management practices to accelerate and enhance scientific workflows in the chemical and materials sciences.

## EDUCATION

- 2016–2023 **PhD Physics**, Theory of Condensed Matter Group, University of Cambridge  
2015–2016 **MPhil Scientific Computing**, University of Cambridge, *Pass with distinction*  
2011–2015 **MPhys Physics with Theoretical Physics**, University of Manchester, *First Class (Hons)*

## SELECTED EXPERIENCE

- 2020– **Postdoctoral Researcher** then **BEWARE Research Fellow** (2022 onwards)  
Université catholique de Louvain and Matgenix, with Prof Gian-Marco Rignanese
- High-throughput, machine-learning accelerated workflows for materials discovery and design.
  - Leading development of the [OPTIMADE](#) API specification and associated software.
- 2021– **Visiting Researcher: Data management platforms for materials chemistry research**  
University of Cambridge, with Prof Clare Grey FRS
- Funded by BIG-MAP External Stakeholder Initiative to develop [data<sup>lab</sup>](#), a data management platform for tracking samples, devices and associated characterisation.
  - Founder and co-leader of a [MaRDA](#) working group on interoperable [metadata extractors](#) in materials science and chemistry.
- 2016–2020 **PhD student: Crystal structure prediction for next-generation energy storage**  
University of Cambridge, with Dr Andrew Morris
- Computational materials discovery for conversion anodes for Li, Na and K-ion batteries.
  - Author of two open-source Python packages: database approaches for high-throughput calculations and materials design with [matador](#) and crystal structure prediction with [ilustrado](#).
  - Active member of the [OPTIMADE consortium](#) for materials database interoperability and author of the [optimade-python-tools](#) package (used in production by The Materials Project, NOMAD, Materials Cloud and others) and [odbx](#) implementation.

## COMPUTING

Languages	<b>Python</b> , Javascript, Vue.js, Fortran, C++	Tools	<b>git</b> , <b>vim</b> , <b>Docker</b> , <b>Ansible</b> , <b>Terraform</b>
Practices	<b>Test-driven development</b> , <b>CI/CD</b> , <b>Cloud Automation</b>	Expertise	Web APIs, databases, machine learning, high-throughput workflows, HPC

## OTHER EXPERIENCE

- 2022 **Postdoctoral Research Associate: Recommender systems**  
*Cambridge Crystallographic Data Centre*
- 2019 **Visiting Researcher: Machine learning for materials discovery**  
Aalto University, with Profs Adam Foster & Patrick Rinke
- 2019 **Scientific Software Developer (Intern): Multi-objective optimisation**  
*Enthought Inc., Cambridge*
- 2014, 2015 **UG research: Interactions of quantised vortices in superfluid helium**  
University of Manchester, with Dr Paul Walmsley & Prof Andrei Golov
- 2014–2015 **MPhys project: Electronic structure of defects in graphene superlattices**  
University of Manchester, with Prof Francisco Guinea
- 2013 **UG research: Hard sphere packing of nanotube-encapsulated fullerenes**  
University of Nottingham, with Dr Ho-Kei Chan & Prof Elena Besley

## SELECTED (AWARDS + HONOURS)

- 2022 BEWARE2 Fellowship from the Wallonia-Brussels Federation to fund 3 years of postdoctoral work (approx. €300,000).
- 2021 PI for “Interoperable data management for fundamental battery research”, BIG-MAP External Stakeholder Initiative, total funding €150,000 (personal allocation €50,000).

## SELECTED (TEACHING + SERVICE)

- 2022– Proposed and co-lead a MaRDA working group on metadata extractors for materials science.
- 2018– Reviewed manuscripts and data for *npj. Comp. Mater.* (x1), *Sci Data* (x1), *J. Phys.: Cond. Mat.* (x4), *Scientific Reports* (x1), *Digital Discovery* (x4), *Machine Learning: Science & Technology* (x1), and *Journal of Open Source Software* (x5)
- 2022– Organiser of the CECAM Workshop series *Machine-actionable Data Interoperability for Chemical Sciences* (MADICES, February 2022 and April 2024)
- 2019-2021 Demonstrator: Part II Computational Physics, 3x Part IB Intro to Computing, Cavendish Laboratory
- 2016–2018 Supervisor: 2x Part IB Electromagnetism, Dynamics and Thermodynamics, Selwyn College
- 2012–2015 Tutor: GCSE Maths & Key Stage 2 Programming for The Tutor Trust, Manchester

## SELECTED RECENT PRESENTATIONS

- 2023 Contributed talk: *Interoperable data management for fundamental battery research*, RSC Annual Advanced Battery Materials Symposium, Institute of Physics, United Kingdom.  
Invited talk: *Open Databases Integration for Materials Design* at the CECAM Flagship Workshop for FAIR and TRUE Soft Matter Simulations, Max Planck Institute for Polymer Research, Germany.  
Invited talk: *Open Databases Integration for Materials Design* at the Actively Learning Materials Science (AL4MS2023) workshop, Aalto University, Finland.
- 2021 Invited panel discussions: *International Materials Data: Joint Meeting and Metadata for Data Indexing and Discovery in Materials Science*, Research Data Alliance (RDA) 18th Virtual Plenary Meeting
- 2019 Contributed talk: *Phosphorus anodes for potassium-ion batteries: insights from crystal structure prediction*, EMRS Spring 2019, Nice, France
