*decentralized data management • open science & software  
materials discovery • ab initio calculations*

## RESEARCH INTERESTS

My background in computational materials science has left me with an overarching interest in the application of machine learning, open source software & infrastructure, and data management practices to accelerate and enhance scientific workflows for discovery in the chemical and materials sciences.

## EDUCATION

- 2016–2023 **PhD Physics**, (*submitted July 2023*), Theory of Condensed Matter Group, University of Cambridge  
2015–2016 **MPhil Scientific Computing**, University of Cambridge, *Pass with distinction*  
2011–2015 **MPhys Physics with Theoretical Physics**, University of Manchester, *First Class (Hons)*

## SELECTED EXPERIENCE

- 2020– **Research Assistant** then **BEWARE Research Fellow** (2022 onwards)  
Université catholique de Louvain and Matgenix, with Prof Gian-Marco Rignanese
- Co-creator and architect of [datalab](#), open source data management software for sample tracking and characterisation, lab management, and machine learning, deployed at several labs internationally.
  - High-throughput machine-learning accelerated workflows for materials discovery and design.
  - Leading development of the [OPTIMADE](#) API specification and associated software.
- 2021– **Visiting Researcher: Data management platforms for materials chemistry research**  
University of Cambridge, with Prof Clare Grey FRS
- Developing bespoke data management platforms for materials chemistry and battery research.
  - Supervising contributions from a full-time software developer and providing user training.
- 2024– **Scientific Software Consultant and Director** (part-time)  
[datalab industries Ltd.](#)
- Supporting the open source development of OPTIMADE and [datalab](#) via consultancy services.
  - Customisation and deployment of [datalab](#) for industrial R&D and academic labs.
- 2016–2020 **PhD student: Crystal structure prediction for next-generation energy storage**  
University of Cambridge, with Dr Andrew Morris
- Computational materials discovery for conversion anodes for Li, Na and K-ion batteries.
  - Author of two open-source Python packages: database approaches for high-throughput calculations and materials design with [matador](#) and crystal structure prediction with [ilustrado](#).

## COMPUTING

Languages	<b>Python</b> , Javascript, Vue.js, Fortran, C++	Tools	<b>git</b> , <b>vim</b> , <b>Docker</b> , <b>Ansible</b> , <b>Terraform</b>
Practices	<b>Test-driven development</b> , <b>CI/CD</b> , <b>Cloud Automation</b> , <b>HPC</b>	Expertise	Web APIs, databases, machine learning, high-throughput workflows

## OTHER EXPERIENCE

- 2022 **Postdoctoral Researcher: Recommender systems for crystal structure search**  
Cambridge Crystallographic Data Centre, Cambridge, UK
- 2019 **Visiting Researcher: Machine learning for materials discovery**  
Aalto University, Finland, with Profs Adam Foster & Patrick Rinke
- 2019 **Scientific Software Developer (Intern): Multi-objective optimisation**  
Enthought Inc., Cambridge
- 2014, 2015 **UG research: Interactions of quantised vortices in superfluid helium**  
University of Manchester, with Dr Paul Walmsley & Prof Andrei Golov
- 2013 **UG research: Hard sphere packing of nanotube-encapsulated fullerenes**  
University of Nottingham, with Dr Ho-Kei Chan & Prof Elena Besley

## SELECTED (AWARDS + HONOURS)

- 2022 BEWARE2 Fellowship from the Wallonia-Brussels Federation (approx. €300,000).
- 2021 PI for “Interoperable data management for fundamental battery research”, BIG-MAP External Stakeholder Initiative (approx. €150,000).

## SELECTED (TEACHING + SERVICE)

- 2018– Reviewed for *JOSS* (x6), *Digital Discovery* (x5), *J. Phys.: Cond. Mat.* (x4), *Mach. Learn.: Sci. Technol.* (x2) (IOP Outstanding Reviewer 2024), *npj. Comp. Mater.* (x1), *Sci Data* (x1), *Sci. Rep.* (x1)
- 2022–2024 Proposed and co-lead a MaRDA working group on metadata extractors for materials science.
- 2022–2024 Initiator and organiser of the CECAM Workshop series *Machine-actionable Data Interoperability for Chemical Sciences* (MADICES, February 2022, April 2024 and upcoming in October 2025)
- 2019-2021 Demonstrator: Part II Computational Physics, 3x Part IB Intro to Computing, Cavendish Laboratory
- 2016–2018 Supervisor: 2x Part IB Electromagnetism, Dynamics and Thermodynamics, Selwyn College
- 2012–2015 Tutor: GCSE Maths & Key Stage 2 Programming for The Tutor Trust, Manchester

## SELECTED RECENT PRESENTATIONS

- 2025 Invited seminar: *Decentralized materials research data management, curation and dissemination for accelerated discovery*, Materials Modelling Discussion Group, University of Birmingham
- Invited seminar: *Decentralized materials research data management, curation and dissemination for accelerated discovery*, PSDI Polymer Data Workshop, Loughborough University
- Invited seminar: *Decentralized materials research data management, curation and dissemination for accelerated discovery*, Computational Chemistry Seminar Series, University of Warwick
- 2024 Invited talk: *Decentralized materials research data management, curation and dissemination for accelerated discovery*, Symposium: Democratizing AI in Materials Science, MRS Fall, Boston, USA
- Invited talk: *Federated, interoperable databases for accelerated materials discovery and design*, CECAM Flagship Workshop on MLIPs and Accessible Databases, Grenoble, France.
- 2023 Invited talk: *Open Databases Integration for Materials Design* at the CECAM Flagship Workshop for FAIR and TRUE Soft Matter Simulations, Max Planck Institute for Polymer Research, Germany.
- Invited talk: *Open Databases Integration for Materials Design* at the Actively Learning Materials Science (AL4MS2023) workshop, Aalto University, Finland.
