*decentralized data management • open science & software
materials discovery • ab initio calculations*

RESEARCH INTERESTS

My background in computational materials science left me with an overarching research interest in the application of machine learning, open source software and infrastructure, and data management practices to accelerate and enhance scientific workflows in the chemical and materials sciences.

EDUCATION

- 2016–2023 **PhD Physics**, Theory of Condensed Matter Group, University of Cambridge
2015–2016 **MPhil Scientific Computing**, University of Cambridge, *Pass with distinction*
2011–2015 **MPhys Physics with Theoretical Physics**, University of Manchester, *First Class (Hons)*

SELECTED EXPERIENCE

- 2020– **Postdoctoral Researcher** then **BEWARE Research Fellow** (2022 onwards)
Université catholique de Louvain and Matgenix, with Prof Gian-Marco Rignanese
- Co-creator and architect of [datalab](#), open source data management software for sample tracking and characterisation, lab management, and machine learning, deployed at several labs internationally.
 - High-throughput machine-learning accelerated workflows for materials discovery and design.
 - Leading development of the [OPTIMADE](#) API specification and associated software.
- 2021– **Visiting Researcher: Data management platforms for materials chemistry research**
University of Cambridge, with Prof Clare Grey FRS
- Developing bespoke data management platforms for materials chemistry and battery research.
 - Supervising development contributions from group members and a part-time software developer.
- 2024– **Scientific Software Consultant and Director** (part-time)
[datalab industries Ltd.](#)
- Supporting the open source development of OPTIMADE and [datalab](#) via consultancy services.
 - Customisation and deployment of [datalab](#) for industrial R&D and academic labs.
- 2016–2020 **PhD student: Crystal structure prediction for next-generation energy storage**
University of Cambridge, with Dr Andrew Morris
- Computational materials discovery for conversion anodes for Li, Na and K-ion batteries.
 - Author of two open-source Python packages: database approaches for high-throughput calculations and materials design with [matador](#) and crystal structure prediction with [ilustrado](#).

COMPUTING

Languages	Python , Javascript, Vue.js, Fortran, C++	Tools	git , vim , Docker , Ansible , Terraform
Practices	Test-driven development , CI/CD , Cloud Automation , HPC	Expertise	Web APIs, databases, machine learning, high-throughput workflows

OTHER EXPERIENCE

- 2022 **Postdoctoral Research Associate: Recommender systems**
Cambridge Crystallographic Data Centre
- 2019 **Visiting Researcher: Machine learning for materials discovery**
Aalto University, with Profs Adam Foster & Patrick Rinke
- 2019 **Scientific Software Developer (Intern): Multi-objective optimisation**
Enthought Inc., Cambridge
- 2014, 2015 **UG research: Interactions of quantised vortices in superfluid helium**
University of Manchester, with Dr Paul Walmsley & Prof Andrei Golov
- 2014–2015 **MPhys project: Electronic structure of defects in graphene superlattices**
University of Manchester, with Prof Francisco Guinea
- 2013 **UG research: Hard sphere packing of nanotube-encapsulated fullerenes**
University of Nottingham, with Dr Ho-Kei Chan & Prof Elena Besley

SELECTED (AWARDS + HONOURS)

- 2022 BEWARE2 Fellowship from the Wallonia-Brussels Federation to fund 3 years of postdoctoral work (approx. €300,000).
- 2021 PI for “Interoperable data management for fundamental battery research”, BIG-MAP External Stakeholder Initiative, total funding €150,000 (personal allocation €50,000).

SELECTED (TEACHING + SERVICE)

- 2022–2024 Proposed and co-lead a MaRDA working group on metadata extractors for materials science.
- 2018– Reviewed manuscripts and data for *npj. Comp. Mater.* (x1), *Sci Data* (x1), *J. Phys.: Cond. Mat.* (x4), *Scientific Reports* (x1), *Digital Discovery* (x4), *Machine Learning: Science & Technology* (x2), and *Journal of Open Source Software* (x5)
- 2022– Organiser of the CECAM Workshop series *Machine-actionable Data Interoperability for Chemical Sciences* (MADICES, February 2022 and April 2024)
- 2019–2021 Demonstrator: Part II Computational Physics, 3x Part IB Intro to Computing, Cavendish Laboratory
- 2016–2018 Supervisor: 2x Part IB Electromagnetism, Dynamics and Thermodynamics, Selwyn College
- 2012–2015 Tutor: GCSE Maths & Key Stage 2 Programming for The Tutor Trust, Manchester

SELECTED RECENT PRESENTATIONS

- 2024 Invited talk (upcoming) in session “Democratizing AI in Materials Science — A Pathway to Broaden the Impact of Materials Research”, MRS Fall, Boston, USA
Contributed paper: *Optical materials discovery and design with federated databases and machine learning*, Faraday Discussions, University of Oxford, United Kingdom.
- 2023 Contributed talk: *Interoperable data management for fundamental battery research*, RSC Annual Advanced Battery Materials Symposium, Institute of Physics, United Kingdom.
Invited talk: *Open Databases Integration for Materials Design* at the CECAM Flagship Workshop for FAIR and TRUE Soft Matter Simulations, Max Planck Institute for Polymer Research, Germany.
Invited talk: *Open Databases Integration for Materials Design* at the Actively Learning Materials Science (AL4MS2023) workshop, Aalto University, Finland.
