*decentralized data management • open science & software
materials discovery • ab initio calculations*

RESEARCH INTERESTS

My background in computational materials science has left me with an overarching interest in the application of machine learning, open source software & infrastructure, and data management practices to accelerate and enhance scientific workflows for discovery in the chemical and materials sciences.

EDUCATION

- 2016–2023 **PhD Physics**, (*submitted July 2023*), Theory of Condensed Matter Group, University of Cambridge
2015–2016 **MPhil Scientific Computing**, University of Cambridge, *Pass with distinction*
2011–2015 **MPhys Physics with Theoretical Physics**, University of Manchester, *First Class (Hons)*

SELECTED EXPERIENCE

- 2025– **Leverhulme Early Career Research Fellow**
University of Cambridge, with Prof Clare Grey FRS
- 2024– **Scientific Software Consultant and Director**
datalab industries Ltd.
 - Supporting the open source development of OPTIMADE and *datalab* via consultancy services.
 - Customisation and deployment of *datalab* for industrial R&D and academic labs.
- 2020–2025 **Research Assistant** (2020–2022) then **BEWARE Research Fellow** (2022–2025)
IMCN, Université catholique de Louvain and Matgenix SRL., with Prof Gian-Marco Rignanese
 - Co-creator and architect of *datalab*, open source data management software for sample tracking and characterisation, lab management, and machine learning, deployed at several labs internationally.
 - High-throughput machine-learning accelerated workflows for materials discovery and design.
 - Leading development of the OPTIMADE API specification and associated software.
- 2016–2020 **PhD student: Crystal structure prediction for next-generation energy storage**
University of Cambridge, with Dr Andrew Morris
 - Computational materials discovery for conversion anodes for Li, Na and K-ion batteries.
 - Author of two open-source Python packages: database approaches for high-throughput calculations and materials design with matador and crystal structure prediction with ilustrado.

COMPUTING

| | | | |
|-----------|---|-----------|--|
| Languages | Python , Javascript, Vue.js, Fortran, C++ | Tools | git , vim, Docker, Ansible, Terraform |
| Practices | Test-driven development , CI/CD, Cloud Automation, HPC | Expertise | Web APIs, databases, machine learning, high-throughput workflows |

OTHER EXPERIENCE

- 2021–2025 **Visiting researcher:** Data management platforms for materials chemistry research
Department of Chemistry, University of Cambridge with Prof Clare Grey
- 2022 **Postdoctoral Researcher** Recommender systems for crystal structure search
Cambridge Crystallographic Data Centre, Cambridge, UK
- 2019 **Visiting Researcher:** Machine learning for materials discovery
Aalto University, Finland, with Profs Adam Foster & Patrick Rinke
- 2019 **Scientific Software Developer (Intern):** Multi-objective optimisation
Enthought Inc., Cambridge
- 2014, 2015 **UG research:** Interactions of quantised vortices in superfluid helium
University of Manchester, with Dr Paul Walmsley & Prof Andrei Golov
- 2013 **UG research:** Hard sphere packing of nanotube-encapsulated fullerenes
University of Nottingham, with Dr Ho-Kei Chan & Prof Elena Besley

SELECTED (AWARDS + HONOURS)

- 2025 Leverhulme Early Career Research Fellowship with additional support from Isaac Newton Trust.
- 2022 BEWARE2 Fellowship from the Wallonia-Brussels Federation (approx. €300,000).
- 2021 PI for “Interoperable data management for fundamental battery research”, BIG-MAP External Stakeholder Initiative (approx. €150,000).

SELECTED (TEACHING + SERVICE)

- 2018– Reviewed for *Digital Discovery* (x7), *JOSS* (x6), *J. Phys.: Cond. Mat.* (x4), *Mach. Learn.: Sci. Technol.* (x2) (IOP Outstanding Reviewer 2024), *npj. Comp. Mater.* (x1), *Sci Data* (x1), *Sci. Rep.* (x1), *Sci. Technol. Adv. Mater.: Methods* (x1).
- 2022–2024 Proposed and co-lead a [MaRDA](#) working group on [metadata extractors](#) for materials science.
- 2022–2024 Initiator and organiser of the CECAM Workshop series *Machine-actionable Data Interoperability for Chemical Sciences (MADICES)*, February 2022, April 2024 and upcoming in October 2025
- 2019–2021 Demonstrator: Part II Computational Physics, 3x Part IB Intro to Computing, Cavendish Laboratory
- 2016–2018 Supervisor: 2x Part IB Electromagnetism, Dynamics and Thermodynamics, Selwyn College
- 2012–2015 Tutor: GCSE Maths & Key Stage 2 Programming for [The Tutor Trust](#), Manchester

SELECTED RECENT PRESENTATIONS

- 2025 Invited talk: *Decentralized materials research data management, curation and dissemination for accelerated discovery*, Machine Learning for Spectroscopy, Vrije Universiteit Brussel, Belgium.
4x Invited seminars: *Decentralized materials research data management, curation and dissemination for accelerated discovery*. Materials Modelling Discussion Group, University of Birmingham; PSDI Polymer Data Workshop, Loughborough University; Computational Chemistry Seminar Series, University of Warwick; AIChemistry Seminar Series, Imperial College London
- 2024 Invited talk: *Decentralized materials research data management, curation and dissemination for accelerated discovery*, Symposium: Democratizing AI in Materials Science, MRS Fall, Boston, USA
Invited talk: *Federated, interoperable databases for accelerated materials discovery and design*, CECAM Flagship Workshop on MLIPs and Accessible Databases, Grenoble, France.
