*decentralized data management • open science & software
materials discovery • ab initio calculations*

RESEARCH INTERESTS

My background in computational materials science has left me with an overarching interest in the application of machine learning, open source software, and data management infrastructure to accelerate and enhance scientific workflows for discovery in the chemical and materials sciences.

EDUCATION

- 2016–2023 **PhD Physics**, (*submitted July 2023*), Theory of Condensed Matter Group, University of Cambridge
2015–2016 **MPhil Scientific Computing**, University of Cambridge, *Pass with distinction*
2011–2015 **MPhys Physics with Theoretical Physics**, University of Manchester, *First Class (Hons)*

SELECTED EXPERIENCE

- 2025– **Leverhulme Trust Early Career Research Fellow**
University of Cambridge, with Prof Clare Grey FRS
– Co-creator and architect of [datalab](#), open source data management software for sample tracking and characterisation, lab management, and machine learning, deployed at several labs internationally.
- 2024– **Scientific Software Consultant and Director**
[datalab industries Ltd.](#)
– Supporting the open source development of OPTIMADE and [datalab](#) via consultancy services.
– Customisation and deployment of [datalab](#) for industrial R&D and academic labs.
– Key stakeholder in projects with partners spanning [PSDI](#), [CCDC](#), University of Nottingham, TUBerlin.
- 2020–2025 **Research Assistant** (2020–2022) then **BEWARE Research Fellow** (2022–2025)
IMCN, Université catholique de Louvain and Matgenix SRL., with Prof Gian-Marc Rignanese
– High-throughput machine-learning accelerated workflows for materials discovery and design.
– Leading development of the [OPTIMADE](#) API specification and associated software.
- 2016–2020 **PhD student: Crystal structure prediction for next-generation energy storage**
University of Cambridge, with Dr Andrew Morris
– Computational materials discovery for conversion anodes for Li, Na and K-ion batteries.
– Author of two open-source Python packages: database approaches for high-throughput calculations and materials design with [matador](#) and crystal structure prediction with [ilustrado](#).

COMPUTING

Languages	Python , Javascript, Vue.js, Fortran, C++	Tools	git , vim , Docker , Ansible , Terraform
Practices	Test-driven development , CI/CD , Cloud Automation , HPC	Expertise	Web APIs, databases, machine learning, high-throughput workflows

OTHER EXPERIENCE

- 2021–2025 **Visiting researcher:** Data management platforms for materials chemistry research
Department of Chemistry, University of Cambridge with Prof Clare Grey
- 2022 **Postdoctoral Researcher** Recommender systems for crystal structure search
Cambridge Crystallographic Data Centre, Cambridge, UK
- 2019 **Visiting Researcher:** Machine learning for materials discovery
Aalto University, Finland, with Profs Adam Foster & Patrick Rinke
- 2019 **Scientific Software Developer (Intern):** Multi-objective optimisation
Enthought Inc., Cambridge
- 2014, 2015 **UG research:** Interactions of quantised vortices in superfluid helium
University of Manchester, with Dr Paul Walmsley & Prof Andrei Golov
- 2013 **UG research:** Hard sphere packing of nanotube-encapsulated fullerenes
University of Nottingham, with Dr Ho-Kei Chan & Prof Elena Besley

SELECTED (AWARDS + HONOURS)

- 2025 Leverhulme Trust Early Career Research Fellowship with additional support from Isaac Newton Trust.
- 2022 BEWARE2 Fellowship from the Wallonia-Brussels Federation (approx. €300,000).
- 2021 PI for “Interoperable data management for fundamental battery research”, BIG-MAP External Stakeholder Initiative (approx. €150,000).

SELECTED (TEACHING + SERVICE)

- 2018– Reviewed for *Digital Discovery* (x7), *JOSS* (x6), *J. Phys.: Cond. Mat.* (x4), *Mach. Learn.: Sci. Technol.* (x2) (IOP Outstanding Reviewer 2024), *npj. Comp. Mater.* (x1), *Sci Data* (x1), *Sci. Rep.* (x1), *Sci. Technol. Adv. Mater.: Methods* (x1), *Physica Scripta* (x1).
- 2025 Co-organiser of the CECAM workshop *OPTIMADE*, Vilnius, Lithuania, September 2025
- 2022–2025 Initiator and organiser of the CECAM Workshop series *Machine-actionable Data Interoperability for Chemical Sciences (MADICES*, February 2022, April 2024 and upcoming in October 2025)
- 2022–2024 Proposed and co-lead a MaRDA working group on metadata extractors for materials science.
- 2019–2021 Demonstrator: Part II Computational Physics, 3x Part IB Intro to Computing, Cavendish Laboratory
- 2016–2018 Supervisor: 2x Part IB Electromagnetism, Dynamics and Thermodynamics, Selwyn College
- 2012–2015 Tutor: GCSE Maths & Key Stage 2 Programming for The Tutor Trust, Manchester

SELECTED RECENT PRESENTATIONS

- 2025 Invited talk: *Decentralized materials research data management, curation and dissemination for accelerated discovery*, Machine Learning for Spectroscopy, Vrije Universiteit Brussel, Belgium.
4x Invited seminars: *Decentralized materials research data management, curation and dissemination for accelerated discovery*. MMDG, Uni. Birmingham; PSDI Polymer Data Workshop, Loughborough Uni.; Comp. Chem. Seminars, Uni. Warwick; AIChemistry Seminars, Imperial College London
- 2024 Invited talk: *Decentralized materials research data management, curation and dissemination for accelerated discovery*, Symposium: Democratizing AI in Materials Science, MRS Fall, Boston, USA
Invited talk: *Federated, interoperable databases for accelerated materials discovery and design*, CECAM Flagship Workshop on MLIPs and Accessible Databases, Grenoble, France.
