Matthew Evans

materials discovery • ab initio calculations data management and APIs • open science & software

EDUCATION

2016— **PhD Physics**, Theory of Condensed Matter Group, University of Cambridge 2015–2016 MPhil Scientific Computing, University of Cambridge, Pass with distinction

2011–2015 MPhys Physics with Theoretical Physics, University of Manchester, First Class (Hons)

EXPERIENCE

Machine learning for small materials datasets (MODNet).

- High-throughput workflows for computational materials discovery and molecular dynamics.

- Continued development of the OPTIMADE API specification and associated software.
- 2021 Visiting Researcher in the group of Prof Clare Grey (University of Cambridge)

 Data management, analysis software and open APIs for materials chemistry research. - Funded by BIG-MAP External Stakeholder Initiative to develop datalab, a data management

- API and web UI for samples and associated characterisation via electrochemical cycling, NMR
- Founder and co-leader of a MaRDA working group on interoperable metadata extractors in materials science and chemistry.
- Cambridge Crystallographic Data Centre

2-month contract to implement a recommender system for the Cambridge Structural Database.

with Dr Andrew Morris (University of Cambridge)

– Author of two open-source Python packages: database approaches for high-throughput calculations and materials design with matador and crystal structure prediction with

- Active member of the OPTIMADE consortium for materials database interoperability and author of the optimade-python-tools package (used in production by The Materials Project, NOMAD, Materials Cloud and others) and odbx implementation.
- Department of Applied Physics, Aalto University Received HPC-Europa funding to visit the group of Prof Adam Foster for 7 weeks, with computational resources provided by the Finnish IT center for science (CSC).

2019 Scientific Software Developer (Intern)

Worked on the open source, Horizon 2020 FORCE project, adding functionality to a workflow

2014–2015 MPhys project: Electronic structure of defects in graphene superlattices with Prof Francisco Guinea (*University of Manchester*)

2014, 2015 UG research: Interactions of quantised vortices in superfluid helium

2013 UG research: Hard sphere packing of nanotube-encapsulated fullerenes

with Dr Paul Walmsley & Prof Andrei Golov (University of Manchester)

COMPUTING Exposure: **Daily**, Intermittent, *Occasional*.

Languages **Python**, Javascript, Vue.js, Fortran, Expertise Web APIs & databases, HT workflows, Cython, C++ Stack FastAPI, pydantic, Flask, Tensorflow

2023 Invited tutorial on OPTIMADE at the Actively Learning Materials Science (AL4MS2023) workshop, Aalto University, Finland.

chemistry 2020 Co-chair of the Research Data Alliance (RDA) IG Materials Data, Infrastructure & Interoperability

Founded and co-lead a MaRDA working group on metadata extractors for materials science and

Practices Test-driven development, CI

- Scientific Reports, Digital Discovery and Journal of Open Source Software
- 2021 Lecturer for "Working with Materials Databases" at the ICTP-East African Institute for Fundamental Research Training School Machine Learning for Electronic Structure and Molecular
- 2021 Mentor at Acceleration Consortium Hackathon on Scientific Databases 2021 Developed and delivered a 2-day OPTIMADE tutorial for the NOMAD Virtual Tutorial Series.
- 2016–2020 Active member of TCM sysadmin team, Cavendish Laboratory 2019-2021 Demonstrator: Part II Computational Physics, Cavendish Laboratory
- 2016–2018 Supervisor: 2x Part IB Electromagnetism, Dynamics and Thermodynamics, Selwyn College
 - Small group teaching, providing detailed feedback on assigned problems.
- 2016–2019 Demonstrator: 4x at annual CASTEP workshop, University of Oxford 2017 Volunteer: 2nd Conference of Research Software Engineers, University of Manchester
- Provided tuition to small groups and 'looked after children' across 15 schools. Helped lead a successful pilot to teach primary school children programming using Scratch.

(approx. €300,000).

final year physics project.

£12,000.

Germany.

- (AWARDS + HONOURS)
 - Stakeholder Initiative, total funding €150,000 (personal allocation €50,000). 2018 Tier-2 HPC Resource Allocation: PI on project awarded 2 MCPUh, Crystal structure prediction
 - 2017 Tier-2 HPC Resource Allocation: Co-investigator on project awarded 4 MCPUh, Ab initio structure prediction for next-generation battery materials, B. Karasulu, M. L. Evans and A. J.
- 2013, 2014 Undergraduate research bursary for two summers as an undergraduate, totalling £4200. 2011-2015 Means-tested and merit based scholarship to study at the University of Manchester, worth

2015 Tesella Prize for Software, University of Manchester, for the most effective use of software in a

and Catalysis Lab, Technische Universität Berlin, Germany. Invited talk: Open Databases Integration for Materials Design at the CECAM Flagship Workshop

for FAIR and TRUE Soft Matter Simulations, Max Planck Institute for Polymer Research,

Invited seminar: Interoperable data management for fundamental battery research, Laboratory

Invited talk: Metadata extractors for interoperable ETL, MaRDA Alliance Annual Meeting Invited talk: Open Databases Integration for Materials Design at the Actively Learning Materials Science (AL4MS2023) workshop, Aalto University, Finland.

of Materials Simulation, Paul Scherrer Institut, Switzerland.

Indexing and Discovery in Materials Science, Research Data Alliance (RDA) 18th Virtual Plenary Invited talk: The OPTIMADE Ecosystem, DoE Battery Genome Initiative

CECAM Workshop, Open Databases Integration for Materials Design 2020

2019 Contributed talk: Phosphorus anodes for potassium-ion batteries: insights from crystal structure prediction, EMRS Spring 2019, Nice, France

Invited talk: matador & OPTIMADE, CECAM Workshop, Open Databases Integration for

Invited talk and workshop demonstration: odbx & OPTIMADE and optimade-python-tools,

Invited talk: matador: databases and crystal structure prediction (slides), CECAM Workshop, Open Databases Integration for Materials Design 2018, EPFL, Switzerland

Poster Presentation: 13th RSC Conference in Materials Chemistry (poster), University of

2016 Poster Presentation: SMARTER5 Conference, University of Bayreuth, Germany

2017 Invited talk: Crystal structure prediction for next-generation battery anodes (slides), Solid State

A Reflection on a Large Language Model Hackathon. Digital Discovery, (2023). DOI:10.1039/D3DD00113J. arXiv: 2306.06283. (2023).

2022 Postdoctoral Research Associate

2016–2020 PhD student: Crystal structure prediction for next-generation energy storage

- Computional materials discovery for conversion anodes for Li, Na and K-ion batteries.

2019 Visiting Researcher

Enthought Inc., Cambridge manager for multi-criteria optimisations. Helped develop Cython bindings for the ACADO toolkit.

with Dr Ho-Kei Chan & Prof Elena Besley (University of Nottingham)

(TEACHING + SERVICE)

Tools git, vim, Docker

DFT **CASTEP**, Quantum Espresso, *GPAW*

- 2018- Reviewed manuscripts and data for npj. Computational Materials, J. Phys.: Cond. Mat.,
- 2022 Organiser for the CECAM Virtual Workshop Machine-actionable Data Interoperability for Chemical Sciences (MADICES)
- Demonstrated scientific Python to beginners in weekly labs (2019 only). - Conceptualised and delivered a tutorial on the basics of version control with Git (2019-2021).
- 2016–2019 Demonstrator: 3x Part IB Introduction to Computing (C++), Cavendish Laboratory
- 2016–2017 Volunteer: Key Stage 2 Code Club, Ridgefield Primary School, Cambridge 2012–2015 Tutor: GCSE Maths & Key Stage 2 Programming for The Tutor Trust, Manchester
 - 2019 HPC-Europa 3 funding to visit Aalto University for 7 weeks and associated computing time.

for next-generation solar absorbers, M. L. Evans, D. O. Scanlon and A. J. Morris.

2022 BEWARE2 Fellowship from the Wallonia-Brussels Federation to fund 3 years of postdoctoral work

2021 PI for "Interoperable data management for fundamental battery research", BIG-MAP External

- HPC Midlands+ Substantial Project: awarded 1.3 MCPUh for High-throughput materials discovery for energy applications, M. L. Evans and A. J. Morris.
- SELECTED PRESENTATIONS 2023 Invited seminar: Interoperable data management for fundamental battery research, Conductivity

Invited panel discussions: International Materials Data: Joint Meeting and Metadata for Data

Materials Design 2019, EPFL, Switzerland

Seminar Series, University of Cambridge

Liverpool

(RDA) 17th Virtual Plenary Meeting 2020 Invited talk: The OPTIMADE Specification, Research Data Alliance (RDA) 16th Virtual Plenary Meeting: Data Infrastructure for Collaborations in Materials Research

Invited panel discussion: Delivery platforms for open marketplaces, Research Data Alliance

- 2018 Contributed talk: Sn-P anodes for potassium-ion batteries: insights from crystal structure prediction, SMARTER6 Conference, Ljubljana, Slovenia
