Matthew Evans

materials discovery • ab initio calculations data management and APIs • open science & software

DhD Dhysics

EDUCATION

2016– **PhD Physics**, Theory of Condensed Matter Group, University of Cambridge 2015–2016 **MPhil Scientific Computing**, University of Cambridge, *Pass with distinction*

2011–2015 MPhys Physics with Theoretical Physics, University of Manchester, First Class (Hons)

EXPERIENCE

2020- Researcher then BEWARE Research Fellow (jointly at Matgenix, 2022 onwards)

with Prof Gian-Marco Rignanese (*Universitè catholique de Louvain*)

— Machine learning for small materials datasets (MODNet).

– Machine learning for small materials datasets (MODNet).
 – High-throughput workflows for computational materials discovery and molecular dynamics.

- High-infoughput workhows for computational materials discovery and molecular dynam
 Continued development of the OPTIMADE API specification and associated software.
- 2021– Visiting Researcher

in the group of Prof Clare Grey (University of Cambridge)

Data management, analysis software and open APIs for materials chemistry research.
 Funded by RIG MAR External Stakeholder Initiative to develop data light a data management.

- Funded by BIG-MAP External Stakeholder Initiative to develop datalab, a data management
 API and web UI for samples and associated characterisation via electrochemical cycling, NMR
- and XRD.
 Founder and co-leader of a MaRDA working group on interoperable metadata extractors in materials science and chemistry.
- 2022 Postdoctoral Research Associate

 Cambrige Crystallographic Data Centre

2-month contract to implement a recommender system for the Cambridge Structural Database.

PhD student: Crystal structure pred

2016–2020 PhD student: Crystal structure prediction for next-generation energy storage
with Dr Andrew Morris (University of Cambridge/University of Birmingham)

Computional materials discovery for conversion anodes for Li, Na and K-ion batteries. Author of two open-source Python packages: database approaches for high-throughput

calculations and materials design with matador and crystal structure prediction with ilustrado.

Active member of the OPTIMADE consortium for materials database interoperability and author of the optimade-python-tools package (used in production by The Materials Project, NOMAD, Materials Cloud and others) and odbx implementation.
 Visiting Researcher

Received HPC-Europa funding to visit the group of Prof Adam Foster for 7 weeks, with

2019 Scientific Software Developer (Intern)

computational resources provided by the Finnish IT center for science (CSC).

Department of Applied Physics, Aalto University

Enthought Inc., Cambridge

Worked on the open source, Horizon 2020 FORCE project, adding functionality to a workflow manager for multi-criteria optimisations. Helped develop Cython bindings for the ACADO toolkit.

2014–2015 MPhys project: Electronic structure of defects in graphene superlattices with Prof Francisco Guinea (University of Manchester)

2014, 2015 UG research: Interactions of quantised vortices in superfluid helium

with Dr Paul Walmsley & Prof Andrei Golov (University of Manchester)

- 2013 **UG research: Hard sphere packing of nanotube-encapsulated fullerenes** with Dr Ho-Kei Chan & Prof Elena Besley (*University of Nottingham*)
- Exposure: **Daily**, Intermittent, *Occasional*.

 Languages **Python**, Javascript, Vue.js, Fortran, Expertise Web APIs & databases, HT workflows, Cython, C++ ML

DFT **CASTEP**, Quantum Espresso, *GPAW*

chemistry

Aalto University, Finland.

COMPUTING

Tools git, vim, Docker Practices Test-driven development, CI

(TEACHING + SERVICE)

2023 Invited tutorial on OPTIMADE at the Actively Learning Materials Science (AL4MS2023) workshop,

Stack FastAPI, pydantic, Flask, Tensorflow

2018– Reviewed manuscripts and data for npj. Computational Materials, J. Phys.: Cond. Mat., Scientific Reports, Digital Discovery and Journal of Open Source Software

2020 Co-chair of the Research Data Alliance (RDA) IG Materials Data, Infrastructure & Interoperability

Founded and co-lead a MaRDA working group on metadata extractors for materials science and

- 2022 Organiser for the CECAM Virtual Workshop Machine-actionable Data Interoperability for Chemical Sciences (MADICES)
- Dynamics

 2021 Mentor at Acceleration Consortium Hackathon on Scientific Databases

2021 Lecturer for "Working with Materials Databases" at the ICTP-East African Institute for Fundamental Research Training School Machine Learning for Electronic Structure and Molecular

- Developed and delivered a 2-day OPTIMADE tutorial for the NOMAD Virtual Tutorial Series.

 2016–2020 Active member of TCM sysadmin team, Cavendish Laboratory
 - Demonstrated scientific Python to beginners in weekly labs (2019 only).
 Conceptualised and delivered a tutorial on the basics of version control with Git (2019-2021).

2016–2019 Demonstrator: 3x Part IB Introduction to Computing (C++), Cavendish Laboratory

2012–2015 Tutor: GCSE Maths & Key Stage 2 Programming for The Tutor Trust, Manchester

2019-2021 Demonstrator: Part II Computational Physics, Cavendish Laboratory

2016–2019 Demonstrator: 4x at annual CASTEP workshop, University of Oxford

- 2016–2018 Supervisor: 2x Part IB Electromagnetism, Dynamics and Thermodynamics, Selwyn College
 Small group teaching, providing detailed feedback on assigned problems.
- Volunteer: 2nd Conference of Research Software Engineers, University of Manchester
 Volunteer: Key Stage 2 Code Club, Ridgefield Primary School, Cambridge
- Provided tuition to small groups and 'looked after children' across 15 schools.
 Helped lead a successful pilot to teach primary school children programming using Scratch.
 - 2022 BEWARE2 Fellowship from the Wallonia-Brussels Federation to fund 3 years of postdoctoral work (approx. €300,000).

Stakeholder Initiative, total funding €150,000 (personal allocation €50,000).

discovery for energy applications, M. L. Evans and A. J. Morris.

2021 PI for "Interoperable data management for fundamental battery research", BIG-MAP External

2019 HPC-Europa 3 funding to visit Aalto University for 7 weeks and associated computing time.

Tier-2 HPC Resource Allocation: PI on project awarded 2 MCPUh, Crystal structure prediction for next-generation solar absorbers, M. L. Evans, D. O. Scanlon and A. J. Morris. HPC Midlands+ Substantial Project: awarded 1.3 MCPUh for High-throughput materials

final year physics project.

SELECTED PRESENTATIONS

■ (AWARDS + HONOURS)

Tier-2 HPC Resource Allocation: Co-investigator on project awarded 4 MCPUh, *Ab initio* structure prediction for next-generation battery materials, B. Karasulu, **M. L. Evans** and A. J.

2015 Tesella Prize for Software, University of Manchester, for the most effective use of software in a

2011–2015 Means-tested and merit based scholarship to study at the University of Manchester, worth £12,000.

2013, 2014 Undergraduate research bursary for two summers as an undergraduate, totalling £4200.

Invited panel discussions: International Materials Data: Joint Meeting and Metadata for Data Indexing and Discovery in Materials Science, Research Data Alliance (RDA) 18th Virtual Plenary Meeting

2023 Invited talk: Metadata extractors for interoperable ETL, MaRDA Alliance Annual Meeting

Invited talk: The OPTIMADE Ecosystem, DoE Battery Genome Initiative

Meeting: Data Infrastructure for Collaborations in Materials Research

prediction, EMRS Spring 2019, Nice, France

Seminar Series, University of Cambridge

CECAM Workshop, Open Databases Integration for Materials Design 2020

Open Databases Integration for Materials Design 2018, EPFL, Switzerland

Invited panel discussion: Delivery platforms for open marketplaces, Research Data Alliance (RDA) 17th Virtual Plenary Meeting

2020 Invited talk: The OPTIMADE Specification, Research Data Alliance (RDA) 16th Virtual Plenary

Invited talk and workshop demonstration: odbx & OPTIMADE and optimade-python-tools,

Invited talk: matador & OPTIMADE, CECAM Workshop, Open Databases Integration for Materials Design 2019, EPFL, Switzerland
 Contributed talk: Sn-P anodes for potassium-ion batteries: insights from crystal structure prediction, SMARTER6 Conference, Ljubljana, Slovenia

Invited talk: matador: databases and crystal structure prediction (slides), CECAM Workshop,

2019 Contributed talk: Phosphorus anodes for potassium-ion batteries: insights from crystal structure

Poster Presentation: 13th RSC Conference in Materials Chemistry (poster), University of Liverpool

2016 Poster Presentation: SMARTER5 Conference, University of Bayreuth, Germany

2017 Invited talk: Crystal structure prediction for next-generation battery anodes (slides), Solid State
