energy storage materials • ab initio calculations
crystal structure databases • open science & software

EDUCATION

2016–	**PhD Physics**, Theory of Condensed Matter Group, University of Cambridge
2015–2016	**MPhil Scientific Computing**, University of Cambridge, *Pass with distinction*
2011–2015	**MPhys Physics with Theoretical Physics**, University of Manchester, *First Class (Hons)*

EXPERIENCE

2020–   **Researcher** then **BEWARE Research Fellow** (jointly at Matgenix, 2022 onwards)
with Prof Gian-Marco Rignanese (*Université catholique de Louvain*)
– Machine learning for small materials datasets (MODNet).
– High-throughput workflows for computational materials discovery and molecular dynamics.
– Continued development of the OPTIMADE API specification and associated software.

2021–   **Visiting Researcher**
in the group of Prof Clare Grey (*University of Cambridge*)
– Data management, analysis software and open APIs for materials chemistry research.
– Funded by BIG-MAP External Stakeholder Initiative to implement functionality for electrochemical cycling, NMR and XRD data management.
– Founder and co-leader of a MaRDA working group on metadata extractors in materials science and chemistry.

2022   **Postdoctoral Research Associate**
Cambridge Crystallographic Data Centre
2-month contract to implement a recommender system for the Cambridge Structural Database.

2016–2020   **PhD student: Crystal structure prediction for next-generation energy storage**
with Dr Andrew Morris (*University of Cambridge/University of Birmingham*)
– Computational materials discovery for conversion anodes for Li, Na and K-ion batteries.
– Author of two open-source Python packages: database approaches for high-throughput calculations and materials design with `matador` and crystal structure prediction with `ilustrado`.
– Active member of the OPTIMADE consortium for materials database interoperability and author of the `optimade-python-tools` package (used in production by The Materials Project, NOMAD and others) and `odbx` implementation.

2019   **Visiting Researcher**
Department of Applied Physics, Aalto University
Received HPC-Europa funding to visit the group of Prof Adam Foster for 7 weeks, with computational resources provided by the Finnish IT center for science (CSC).

2019   **Scientific Software Developer (Intern)**
Enthought Inc., Cambridge
Worked on the open source, Horizon 2020 FORCE project, adding functionality to a workflow manager for multi-criteria optimisations. Helped develop Cython bindings for the ACADO toolkit.

2014, 2015   **UG research: Interactions of quantised vortices in superfluid helium**
with Dr Paul Walmsley & Prof Andrei Golov *(University of Manchester)*

2014–2015   **MPhys project: Electronic structure of defects in graphene superlattices**
with Prof Francisco Guinea *(University of Manchester)*

2013   **UG research: Hard sphere packing of nanotube-encapsulated fullerenes**
with Dr Ho-Kei Chan & Prof Elena Besley *(University of Nottingham)*

COMPUTING

Exposure: **Daily**, Intermittent, *Occasional*.

Languages	**Python**, Fortran, Cython, C++	Databases	**MongoDB**, SQL, Elasticsearch
DFT	**CASTEP**, Quantum Espresso, *GPAW*	Packages	**NumPy**, SciPy, matplotlib, scikit-learn, FastAPI, *Tensorflow*
Tools	**git**, **vim**, Docker	Practices	**Test-driven development, CI**

(TEACHING + SERVICE)

2022–   Founded and co-lead a MaRDA working group on metadata extractors for materials science and chemistry

2020–   Co-chair of the Research Data Alliance (RDA) IG *Materials Data, Infrastructure & Interoperability*

2018–   Reviewed manuscripts and data for *npj. Computational Materials*, *J. Phys.: Cond. Mat.*, *Scientific Reports*, *Digital Discovery* and *Journal of Open Source Software*

2022   Organiser for the CECAM Virtual Workshop *Machine-actionable Data Interoperability for Chemical Sciences* (MADICES)

2021   Lecturer for "Working with Materials Databases" at the ICTP-East African Institute for Fundamental Research Training School *Machine Learning for Electronic Structure and Molecular Dynamics*

2021   Mentor at Acceleration Consortium Hackathon on Scientific Databases

2021   Developed and delivered a 2-day OPTIMADE tutorial for the NOMAD Virtual Tutorial Series.

2016–2020   Active member of TCM sysadmin team, Cavendish Laboratory

2019-2021   Demonstrator: Part II Computational Physics, Cavendish Laboratory
– Demonstrated scientific Python to beginners in weekly labs (2019 only).
– Conceptualised and delivered a tutorial on the basics of version control with Git (2019-2021).

2016–2018   Supervisor: 2x Part IB Electromagnetism, Dynamics and Thermodynamics, Selwyn College
– Small group teaching, providing detailed feedback on assigned problems.

2016–2019   Demonstrator: 3x Part IB Introduction to Computing (C++), Cavendish Laboratory

2016–2019   Demonstrator: 4x at annual CASTEP workshop, University of Oxford

2017   Volunteer: 2nd Conference of Research Software Engineers, University of Manchester

2016–2017   Volunteer: Key Stage 2 Code Club, Ridgefield Primary School, Cambridge

2012–2015   Tutor: GCSE Maths & Key Stage 2 Programming for The Tutor Trust, Manchester
– Provided tuition to small groups and 'looked after children' across 15 schools.
– Helped lead a successful pilot to teach primary school children programming using Scratch.

(AWARDS + HONOURS)

2022   BEWARE2 Fellowship from the Wallonia-Brussels Federation to fund 3 years of postdoctoral work (approx. €300,000).

2021   PI for "Interoperable data management for fundamental battery research", BIG-MAP External Stakeholder Initiative, total funding €150,000 (personal allocation €50,000).

2019   HPC-Europa 3 funding to visit Aalto University for 7 weeks and associated computing time.

2018   Tier-2 HPC Resource Allocation: PI on project awarded 2 MCPUh, *Crystal structure prediction for next-generation solar absorbers*, **M. L. Evans**, D. O. Scanlon and A. J. Morris.

HPC Midlands+ Substantial Project: awarded 1.3 MCPUh for *High-throughput materials discovery for energy applications*, **M. L. Evans** and A. J. Morris.

2017   Tier-2 HPC Resource Allocation: Co-investigator on project awarded 4 MCPUh, *Ab initio structure prediction for next-generation battery materials*, B. Karasulu, **M. L. Evans** and A. J. Morris.

2015   Tessella Prize for Software, University of Manchester, for the most effective use of software in a final year physics project.

2013, 2014   Undergraduate research bursary for two summers as an undergraduate, totalling £4200.

2011–2015   Means-tested and merit based scholarship to study at the University of Manchester, worth £12,000.

SELECTED PRESENTATIONS

2021   Invited panel discussions: *International Materials Data: Joint Meeting* and *Metadata for Data Indexing and Discovery in Materials Science*, Research Data Alliance (RDA) 18th Virtual Plenary Meeting

Invited talk: *The OPTIMADE Ecosystem*, DoE Battery Genome Initiative

Invited panel discussion: *Delivery platforms for open marketplaces*, Research Data Alliance (RDA) 17th Virtual Plenary Meeting

2020   Invited talk: *The OPTIMADE Specification*, Research Data Alliance (RDA) 16th Virtual Plenary Meeting: Data Infrastructure for Collaborations in Materials Research

Invited talk and workshop demonstration: *odbx & OPTIMADE* and *optimade-python-tools*, CECAM Workshop, Open Databases Integration for Materials Design 2020

2019   Contributed talk: *Phosphorus anodes for potassium-ion batteries: insights from crystal structure prediction*, EMRS Spring 2019, Nice, France

Invited talk: *matador & OPTIMADE*, CECAM Workshop, Open Databases Integration for Materials Design 2019, EPFL, Switzerland

2018   Contributed talk: *Sn-P anodes for potassium-ion batteries: insights from crystal structure prediction*, SMARTER6 Conference, Ljubljana, Slovenia

Invited talk: *matador: databases and crystal structure prediction* (slides), CECAM Workshop, Open Databases Integration for Materials Design 2018, EPFL, Switzerland

2017   Invited talk: *Crystal structure prediction for next-generation battery anodes* (slides), Solid State Seminar Series, University of Cambridge

Poster Presentation: 13th RSC Conference in Materials Chemistry (poster), University of Liverpool

2016   Poster Presentation: SMARTER5 Conference, University of Bayreuth, Germany
